

Can You Spot the HIDDEN HAZARDS in Your Home?

1 Windows

Never place a crib or playpen near a window. To prevent strangulation, install only cordless window coverings or those with inaccessible cords. Look for products marked with the Best for Kids™ certification label available nationwide.

1

2 Recalled Products

Be aware of the latest safety recalls and get dangerous products out of the home. Sign up for recall notices now at www.cpsc.gov.

2

3 Pools & Spa Drains

Suction from a pool or spa drain can be powerful enough to trap a child or adult underwater. Inspect pools and spas for missing or broken drain covers.

3

4 Magnets

Small powerful magnets, if swallowed, can attract inside the body and block, twist or tear the intestines. If you think your child has swallowed a magnet, seek medical attention immediately.

4

5 Tipovers

Kids will climb. Top-heavy furniture, TVs and stoves can tip over and crush young children. Make them all more stable by installing anchors and brackets.

5

The Top Five Hidden Home Hazards, identified by the Consumer Product Safety Commission, are associated with products that people may be using every day, but are unaware of the dangers they may cause.
